attached emulator

#### Paths

adb -e <command>

adb shell

COMMAND	EXPLANATION
/data/data/ <package>/databases</package>	app databases
/data/data/ <package>/shared_prefs/</package>	shared preferences
/data/app	apk installed by user
/system/app	pre-installed APK files
/mmt/asec	encrypted apps / App2SD
/mmt/emmc	internal SD Card
/mmt/adcard	external/Internal SD Card
/mmt/adcard/	external SD Card

# Path Commands

external\_sd

**COMMAND** 

adb shell ls	list directory contents
adb shell ls -s	print size of each file
adb shell ls -R	list subdirectories recursively

**EXPLANATION** 

#### Table

COMMAND	EXPLANATION
adb shell list packages	list package names
adb shell list packages -r	list package name + path to apks
adb shell list packages -3	list third party package names
adb shell list packages -s	list only system packages
adb shell list packages -u	list package names + uninstalled
adb shell dumpsys package packages	list info on all apps
adb shell dump <name></name>	list info on one package
adb shell path <package></package>	path to the apk file

adb shell am start -t image/\* -a android.intent.action.VIEW

#### Package Installation

COMMAND	EXPLANATION
adb shell install <apk></apk>	install app
adb shell install <path></path>	install app from phone path
adb shell install -r <path></path>	install app from phone path
adb shell uninstall <name></name>	remove the app

## File Operations

LOCATOR	EXPLANATION
adb push <local> <remote></remote></local>	copy file/dir to device
adb pull <remote> <local></local></remote>	copy file/dir from device
run-as <package> cat <file></file></package>	access the private package files

# Phone Info

COMMAND	EXPLANATION
adb get-state	print device state
adb get-serialno	get the serial number
adb shell dumpsys iphonesybinfo	get the IMEI
adb shell netstat	list TCP connectivity
adb shell pwd	print current working directory
adb shell dumpsys battery	battery status
adb shell pm list features	list phone features
adb shell service list	list all services
adb shell dumpsys activity <package>/<activity></activity></package>	activity info
adb shell ps	print process status
adb shell wm size	displays the current screen resolution
dumpsys window windows   grep -E 'mCurrentFocus mFocusedApp'	print current app's opened activity

### COMMAND EXPLANATION

adb shell dumpsys battery set

level <n>

**Configure Settings Commands** 

adb shell dumpsys battery set status <n></n>	change the level to unknown, charging, discharging, not charging or full
